May 2, 1998

Dear Mr. Snow,

MAY 06 1998

- * *I* Oppose all CALFED alternatives that require construction of new or enlarged dams and canals, including the Peripheral Canal and an enlarged Shasta dam. Feel free to mention any other specific dam and canal projects summarized in this alert.
- * *I* Urge CALFED to expand water efficiency, conservation, and reclamation programs to stretch our existing water supplies, instead of building new dams and canals.
- * *I* Support CALFED's proposed restoration objectives for Central Valley stream flows, water temperature, stream meander, flood plain management, and riparian/riverine habitat, as well as all sensitive, threatened, and endangered species. These restoration objectives are needed to mitigate the impacts of current water facilities.
- * *I* Oppose CALFED's proposed restoration objectives for upper watershed forest management and delta hydraulics. We cannot reduce the wildfire threat in the upper watersheds by increasing logging and we cannot resolve the delta's flow problems by building more dams and diversions.

Sincerely,
 Joni Freed
